Send Koha codes to Brodart

- Select *Reports* from the *More* drop-down menu in Koha
- Click *Create from SQL* in the *Guided Reports* section of the *Reports* page
- Enter *Report Name* and *Select statement* for each of the reports listed below
- Save and run each report
- Download results in *comma separated text* format and attach to email to your customer care associate at Brodart Company

The screenshot shows the 'Create report from SQL' form in Koha. At the top is a '+ New report' button. The form has a tab labeled 'Create report from SQL'. Below the tab are several fields: 'Report name' with the value 'Branch Codes' and a 'Required' label; 'Report group' with a radio button for 'Select' and a dropdown menu showing '(None)', followed by 'or create:' with 'Code' and 'Name' options; 'Report is public' with a dropdown menu showing 'No (default)'; 'Cache expiry' with a text input '300' and a dropdown menu 'Seconds (default)'; and a 'Notes' text area. Below these fields is a tab labeled 'SQL:'. Under this tab is a large text area containing the SQL query: 'SELECT branchcode AS "Branch Code", branchname AS "Branch Name" from branches;'. To the right of the SQL text area is a 'Required' label. At the bottom of the form are two buttons: 'Save report' and 'Cancel'.

Figure 1. Example report

- Report Name: **Branch Codes**
 - `SELECT branchcode AS "Branch Code", branchname AS "Branch Name" from branches;`
- Report Name: **Collection Codes**
 - `SELECT authorised_value AS "Collection Code", lib AS "Collection Name" FROM authorised_values WHERE category = 'CCODE';`
- Report Name: **Shelving Location Codes**
 - `SELECT authorised_value AS "Shelving Location Code", lib AS "Shelving Location Name" FROM authorised_values WHERE category = 'LOC';`

- Report Name: **Item Type Codes**
 - `SELECT itemtype AS "Item Type Code", description AS "Item Type Name" FROM itemtypes;`
- Report Name: **Fund Codes**
 - `SELECT budget_code AS "Fund Code", budget_name AS "Fund Name" FROM aqbudgets GROUP BY budget_code ORDER BY timestamp DESC;`

Install the Brodart EDI plugin for Koha

- Open the link <https://github.com/bywatersolutions/koha-plugin-edifact-enhanced/releases> in a web browser.
- Locate most recent *koha-plugin-edifact-enhanced-brodart* plugin
- Click the *kpz* file to Download
- In Koha, Select *Administration* from the *More* drop-down menu
- Click *Manage plugins* in the Plugins section of the Administration Page
- Click the *Upload plugin* button
- Click the *Choose File* button
- Select the plugin file you just downloaded and click the *Open* button.
- Click the *Upload* button
- You should now see a new plugin named *Edifact - Brodart*

Create a Brodart Vendor Record

- Select *Administration* from the *More* drop-down menu in Koha
- Click *EDI accounts* in the Acquisition parameters section of the Administration page
- Click the *New Account* button
- Select *Brodart* as the Vendor
- Select *Edifact – Brodart* as the Plugin
- Select *FTP* as the Transport
- Enter *ftp.brodart.com* as the Remote host
- Enter the *username* and *password* from the Brodart EDI Order Information sheet
- Enter *Out* as the Download directory
- Enter *In* as the Upload directory
- Select *US SAN Agency (31B)* as the Qualifier
- Enter *1697684* as the SAN (Brodart's *Standard Address Number*)
- Check *Order enabled*
- Check *Invoices enabled*

New account

Vendor: Brodart

Plugin: Edifact - Brodart

Description: Brodart EDI

Transport: FTP

Remote host: ftp.brodart.com

Username: username

Password: password

Download directory: Out

The download directory specifies the directory on the ftp site from which quotes and invoices are downloaded.

Upload directory: In

The upload directory specifies the directory on the ftp site to which orders are uploaded.

Qualifier: US SAN Agency (31B)

SAN: 1697684

Quotes enabled:
☐

Orders enabled:
☒

Invoices enabled:
☒

Responses enabled:
☐

Automatic ordering:
☐

With automatic ordering quotes generate orders without staff intervention.

Create Brodart Account Records (EANs)

Create an EAN for each unique Brodart account number on the attached EDI Order Information sheet. “Spec codes” are to be entered as the first character of the basket name, sent as the purchase order number, to further define processing.

- Select *Administration* from the *More* drop-down menu in Koha
- Click *Library EANs* in the Acquisition parameters section of the Administration page
- Click the *New EAN* button
- Select *Brodart* as the Vendor
- Select your library from the library pulldown
- Enter a “Brodart account number” from the Brodart EDI Order Information sheet
- Select *US SAN Agency (31B)* as the Qualifier

New EAN

Library: Select Your Library ▼

Description: Brodart - Flex Cataloging and Processing

EAN: Brodart Account

Qualifier: US SAN Agency (31B) ▼

Figure 3. Library EAN creation form

Create MARC Record Import Map

- Select “Administration” from the “More” drop-down menu in Koha
- Click “Global system preferences” on the Administration page
- Click the “Click to Edit” hyperlink in the field to the right of “MarcItemFieldsToOrder”
- Enter the following information into the data entry box

```
homebranch: 946$a
holdingbranch: 946$a
budget_code: 946$f
itype: 946$y
ccode: 946$t
loc: 946$8
quantity: 946$q
price: 946$p
replacementprice: 946$p
itemcallnumber: 946$n
notforloan: 946$7
```

- Click “Save all Acquisitions preferences” button

MarcItemFieldsToOrder	<p>Set the mapping values for new item records created from a MARC record in a staged file.</p> <pre> homebranch: 946\$a holdingbranch: 946\$a budget_code: 946\$f itype: 946\$y notforloan: 946\$l ccode: 946\$t loc: 946\$8 quantity: 946\$q price: 946\$p replacementprice: 946\$p itemcallnumber: 946\$n </pre> <p>Click to collapse You can use the following fields: homebranch, holdingbranch, itype, nonpublic_note, public_note, loc, ccode, notforloan, uri, copyno, price, replacementprice and itemcallnumber. Special fields: quantity and budget_code For example: holdingbranch: 975\$b itype: 975\$9 975\$z</p>
